Table 1-1 Component

S.No	Component	Description	Technology
1.	User Interface	How user Interact- with application e.g. Web UI, Mobile App, Chatbot etc..	HTML, CSS, JavaScript / Angular JS / Black JS etc.
2.	Application Logic-1	Logic for EV charging processes	Java / Python
3.	Application Logic-2	Logic for monitoring EV Isatery status	IBM Watson IoT service
4.	Application Logic-3	Logic for EV range prediction e.g.	IBM Watson Assistant
5.	EV Database	SQL, NoSQL platforms	MySQL, NoSQL
6.	Cloud Database	Database service on the cloud	IBM DB2, IBM Cloudant / SQL, NoSQL
7.	EV Charging Station Interface	Connects with EV charging station API for real-time data	OCPP, OCS, J1772, CCS, CHAdeMO
8.	External API-1	Purpos of External API used in the application	Meather dats / Mapping APIs / Charging Vetsom, APIs, (NREL AP), Google Maps
9.	External API-2	Purpos of External API used in the application	Aadhar API, etc.
10.	EV Range Prediction (Machine Learning Model)	Protects EV range an hatorical and real-time data	Tereot, Cloud Foundry, Kubernetes, etc.
11.	Infrastructure (Server / Cloud)	Application Deployment on Local System / Cloud Server Configuration:	Local, Cloud Foundry, Kubernetes, etc.
11.	Infrastructure (Server / Cloud)	Application deployment on Local System / Cloud Server Configuration:	Local, Cloud Foundry, Kubernetes, etc.

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	List the bealinterfor-ve with application e.g. Web UI, Mobile App, Chatbot etc..	HTML, CSS, JavaScript / Angular JS / Black JS etc.
2.	Security/ Access Controls	Securbas / cacesing, EV Isatery Status	OAuth, SSL, HTTPS
3.	Scalable Architecture	Purpos of External API used in the application (OCPP, Nola, etc.)	3-tier, (oremoble, IBM, Micro-services)
4.	Ev Database	MySQL, NoSQL	MySQL, NoSQL
5.	Cloud Database	Database service on Cloud	IBM DB2, IBM Cloudant / SQL NoSQL
7.	EV Charging Station Interface	Connect- with EV Charging station API for breal time data	OCPP, OCS, J1772, CCS, CHAdeMO
8.	External API-1	Meather data / Mapping APIs, /Charging Vetsom, API- (HREL API, Google Maps, API, Nea API-ete)	INREL API, Google Maps, API, OpenMeather Mars, Nerrom, API-etc. i
9.	External API-2	Purpos of External API used in the applicaig	Aadhar API, etc.
